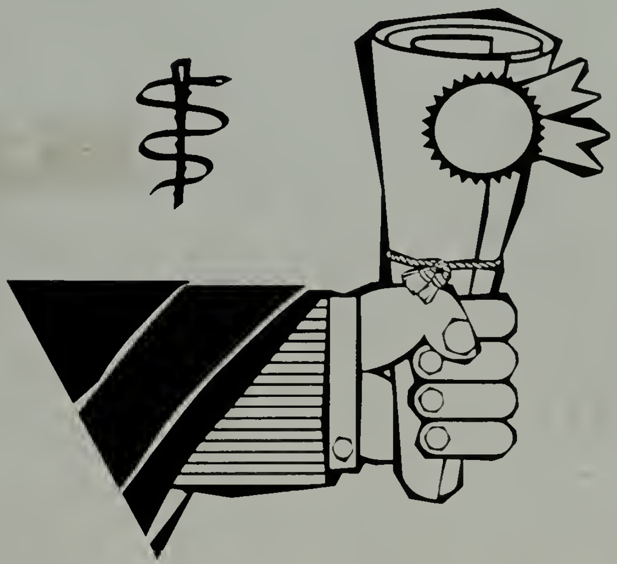
MEDICAL SCHOOL
made ridiculously simple



Samuel Hahnemann, M.D.

Welcome

On August 20th, 1987, we the Hahnemann University School of Medicine Class of 1991 began a great adventure. As the four years passed, the men and women of our class grew into promising physicians, surgeons, and healers. Now, as we approach Graduation Day, we look back and see all that we have accomplished. Our task was not easy, but it was worth our efforts.

The job of an M.D. is to teach as well as heal. With this in mind, we offer the following for the benefit of those who shall walk in our footsteps.

Enjoy!

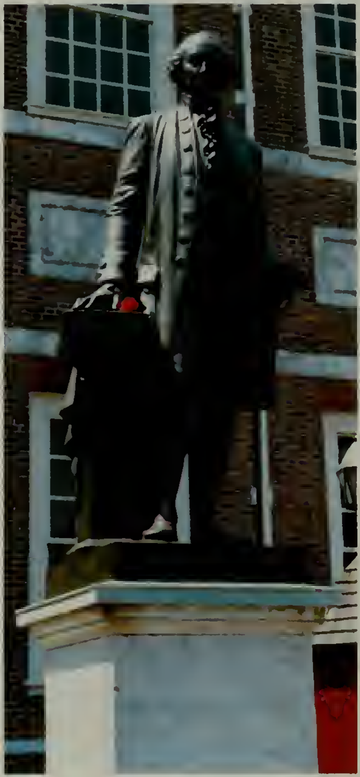
CHAPTER 1.

A SURVIVAL GUIDE TO MEDICAL SCHOOL

Rule #1: Know the City



BEST OF PHILLY

FORREST
FORREST
Les Misérables
FORREST THEATRE

Rule #2: Always Know How to Find the School

EXIT
15 TH ST
Hahnemann University
University Entrance

Rule #3: When you meet your classmates, always remember: The Admissions Office Did It!

THE GEARY AUDITORIUM

This student is demonstrating Rule #4. You can only imagine what is going on behind those doors.

Rule #5: This student is demonstrating the "Catch a Snooze" rule. She has learned from experience that the elevators will arrive in half an hour.

Rule #6: Keep your teachers well bribed.

Rule #7: This is what you will find in the typical Hahnemann office between the hours of 9AM and 5PM

Rules #8: Yes it is possible to pass your exams and get a good tan

Rule #9: The successful medical student finds creative uses for his tools.

Rule #10: Never be surprised. Always know what is waiting for you behind Door Number 3.

EXIT
INTERMEDIATE MEDICAL
Visiting Ho
1:00-4:00
6:00-8:30 p

Rule #11: Let the Fourth Year Students Demonstrate the Milestones of Medical School.

1. The First Rectal

2. Changing Positions in the O.R.: Back to Back

3. After the Exams

Rule #12: Let the Fourth Year Students Demonstrate Metabolic Manipulation:

1. Inhibiting A.D.H.

2. Going for Sympathetic Discharge

3. Establishing Euglycemia

The beeper belonging to the student on the extreme right is going off. The student next to him is about to violate Rule #13: Let sleeping dogs lie - many a reputation is based on knowing when to do nothing. The student on the extreme left is oblivious.

This student has successfully followed Rule #14. He got up and saw the patient. Alexander Graham Bell can get you into trouble.

Rule #15: When writing a differential, remember the words of Occam: "Entia non sunt multiplicanda praeter necessitatem." Also, don't cut yourself on the razor.

This student is unaware of Rule #16: There is nowhere to hide from your attendings, especially if you are on Medicine C.

Rule #17: Toga! Toga! Toga!

PATIENT
PATIENT
PATIENT

Rule #18: Don't be caught on call during Toga!

Rule #19: Varied is the Costume of the Medical Student

Rule #20: You Can Survive Medical School, With Your Friends.

DANGER!
DEEP POND

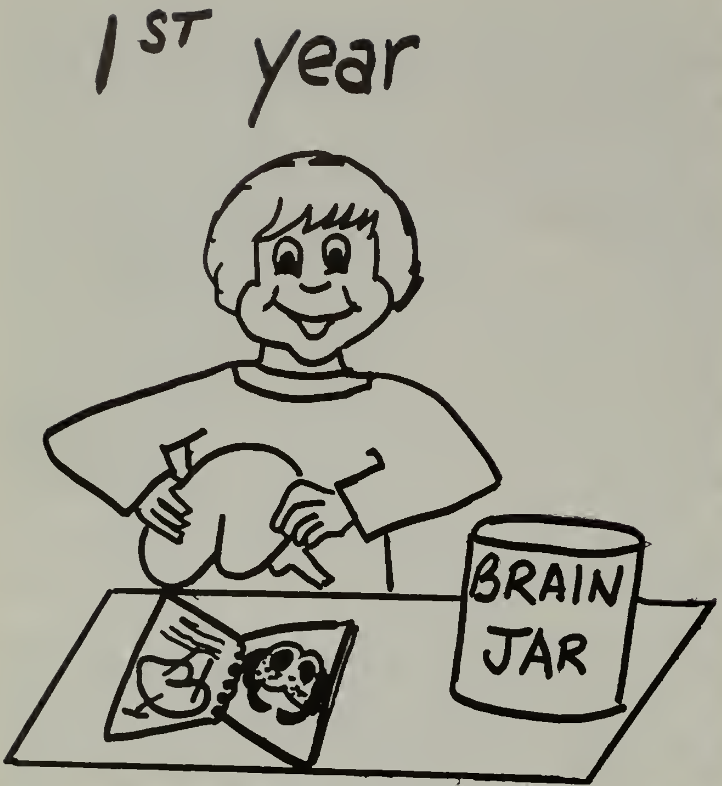
KK 91

Medical School: Where you learn to juggle.

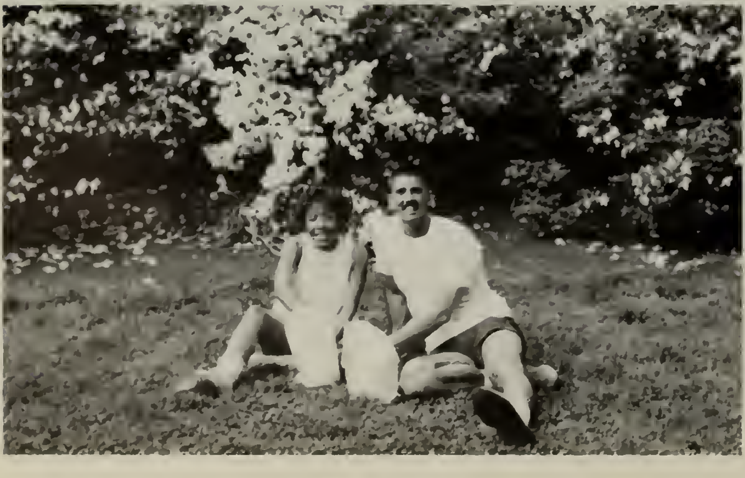
Class of '91: The First Year

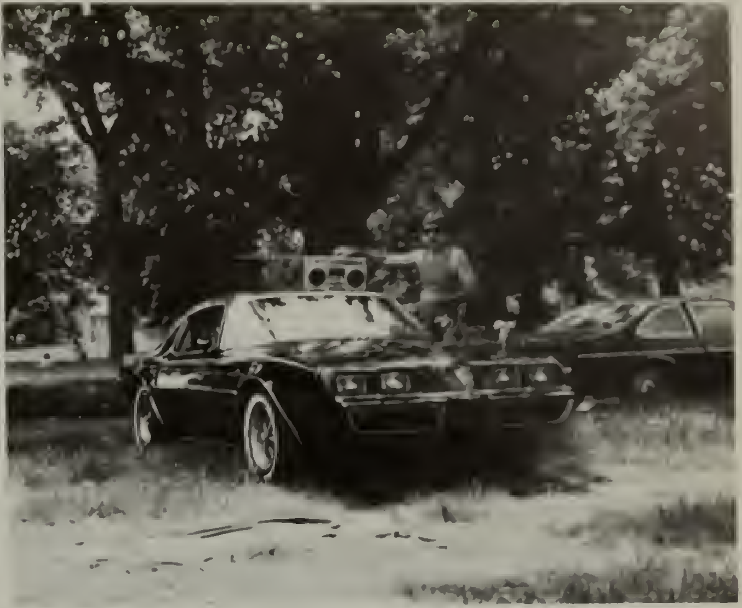


1ST year
BRAIN JAR

Aloha! We are your Geary cruise directors. You better hang on. It's going to be bumpy ride.

Purr ... Meow? ... &%*@ ... Hiss!! ... Scratch!

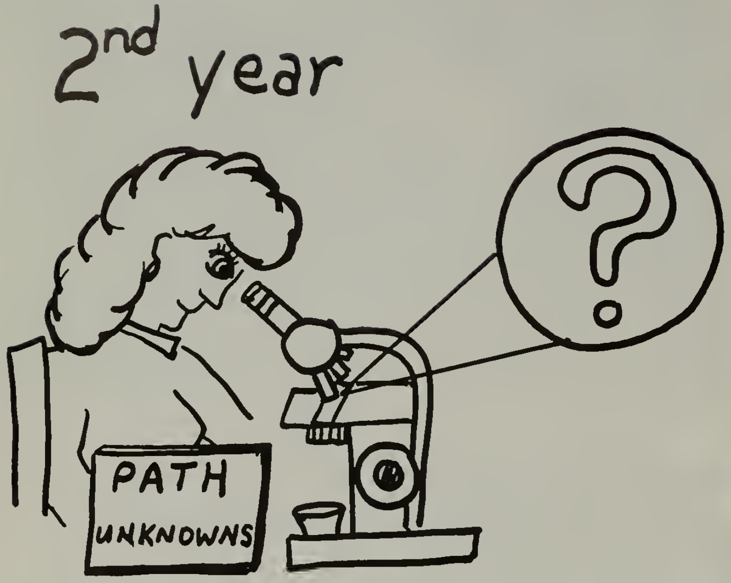




Just sit right back
and you'll hear the tale
The tale of a fateful trip
That started from this back yard?
Aboard this flimsy ship?
The mate was a St. Joe's man
The skipper drunk and sure
Two passengers that sailed that day
On a ten minute tour? . . .

)f course, we spent most of our
ime in Geary Auditorium.

Class Of '91: The Second Year



2nd year
PATH
UNKNOWNS

Uh . . . Is that a Thyroid?

Year's Highlight: The Boards are over!

-C-O-P-O-L-A-M-I-N-E

Urrp . . .

Class of '91: The Follies

The small intestine has a lining that looks ah like a lasagna you know
We also have the ah gall bladder and the liver... which are important here but ah read that in the book.
You need to know everything that I have justa said... and of course ... everything in the book.

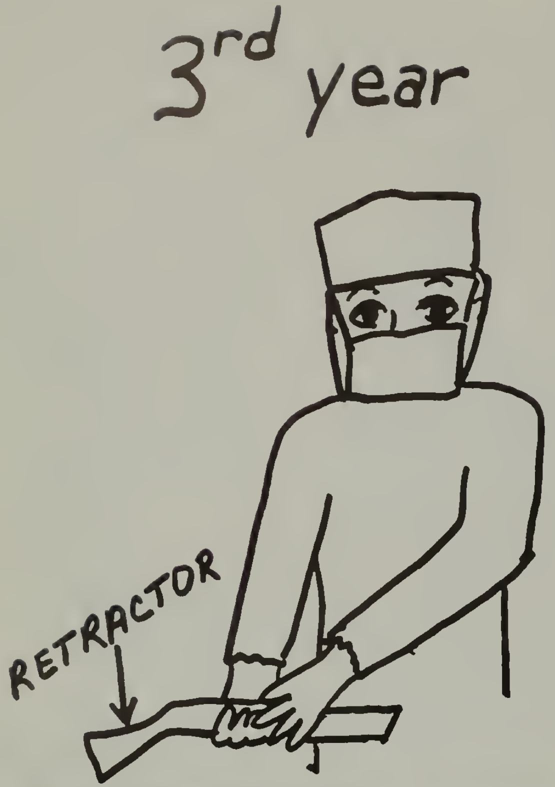
Dr. Haroian is dreamy
He looks like an aged Dr. Rubertone
Too bad about that bald spot
Bald spot? I thought it was a yamulka

If you think you got a fungus
You come see me
I'll give you shit-eating grin
And Amphotericin B

I've discovered Mr. Beer-Bag
Scientific studies have shown that the kidney only holds about 60% of the alcohol that passes through it.

15: What is the average number of students attending a Psych lecture?
Geophagia: What is "What the class did during the second Biochem test"?
Old People Having Sex: What is "Riding a bicycle"?

Class Of '91: The Third Year



3rd year
RETRACTOR

"It's good to be in scrubs."

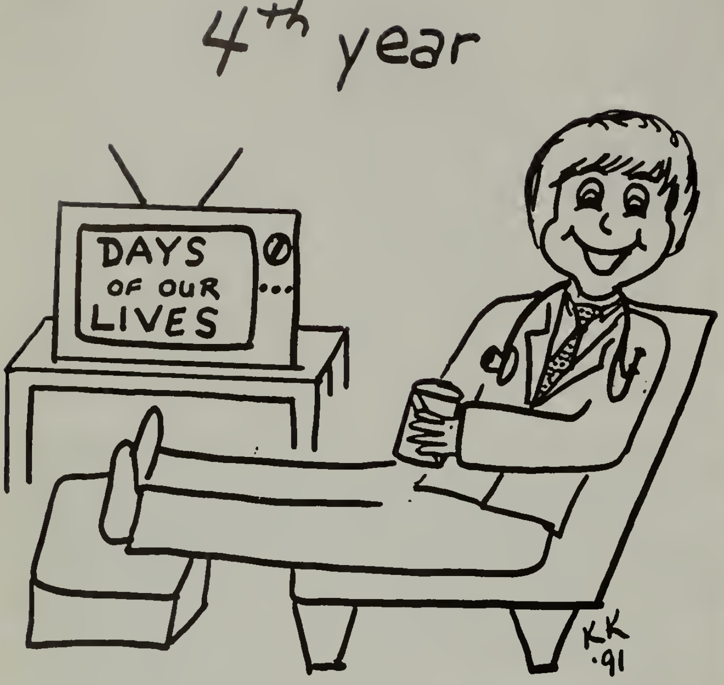
"It's good to be out of scrubs."

THE THIRD YEAR

What you asked for:	What you got (4 months later):
1. Medicine... Hahnemann .. Med A	1. Vacation
2. Medicine... Allentown	2. Peds ..... Crozer-Chester
3. Ob/Gyn.... Crozer-Chester	3. Psych .... Holmesburg Prison
4. Peds.......... Monmouth	4. Ob-Gyn .. Erie
5. Surgery..... Hahnemann	5. Medicine . Hahnemann .. Nephro A
6. Surgery..... Hahnemann	6. Medicine . Sayre
7. Psych........ Liason	7. Surgery .. Easton
8. Vacation	8. Surgery .. Easton

It's the end of third year. Why are we back in Geary? What is this about Boards and Residence? Well, at least they feed us afterwards

Class Of '91: The Fourth Year



4th year
DAYS OF OUR LIVES
KK '91

Only nine more months to Match Day!

My Sub starts when?

A nip here, a tuck there, Boy, I love the O.R.

Snow? I don't need no freakin snow! I just need to look good.

Chapter 3.
Faculty

Iqbal F. Paroo
President and Chief Executive Officer

Dear Members of the Class of 1991,

Congratulations and best wishes to you as you move ahead in your careers in medicine.

I know that you will use the knowledge and experience that you have gained at Hahnemann to care for your fellow men and women to the best of your abilities.

As alumni of the great University, I hope that each of you will maintain the tradition of excellence among its graduates and that you will return with pride and accomplishment.

Sincerely,

Iqbal

Dr. S. B. Kahn and Dr. L. Brodsky

Chapter 4.
Medical School: You Got To Love It!

160 down, 3 to go. You want to go where for your rotation? Impossible! 161 down, 2 to go

Hey Dave, 3 more and we have a complete set

Hey look! I can do this and eat at the same time

Under the table

Scott Mayerberger in his native habitat

Go to medical school and you too can live HERE!!

op 10 Biggest Lies Told to the Class of '91

0. The hardest part about medical school is getting in, nobody ever fails out
9. We'll work with you
8. Sorry, all that's left for Ambulatory is in Tennessee
7. After the merger, you'll get to do your Subs at Allegheny
6. Don't worry if you fail the 1st Biochem test, the 2nd is the easiest
5. I'll keep you informed every step of the way
4. There were no repeat questions on the 2nd ICM test
3. Escalator Temporarily Out of Service
2. You'll have your schedules in 3 weeks
1. It's all in the manual

Oh No! Rounds in 3 min. I need to know his BUN! What does N/A mean?

o Comment

Without me, you'd starve!!

Tomorrow, we remove this

m in Medical School! Tah-dah!!

A: "I can't wait till Nephro rounds tomorrow"
C: "Here's an interesting pt. with a Creatinine of 3.0"
L: "I wonder what Dr. Krevolin looks like naked?"

Now that I'm President, I have a few things to say. It should take me Oh, about 5 hours

Yes kid, we'll be done by Graduation

Tick . . . Tick . . . Tick . . . Tick . . . Thud!

Mmmm . . . No crepitus!

What? I did the H + P on the wrong patient?

When I examine patients, I only use these

Don't you hate it when HUH nurses turn their backs on you

My three hour lunch is over. I think I'll go back now.

While Perlman speaks, the students plan their escape.

Ah, Med School. What a life!

It's only a Sub, I'm working.

Hahnemann at night.

DANGER!
DEEP POND
MONITOR YOUR
CHILDREN & PETS

Which is which?

Want to see what the patients are up to? Nah, me neither.

How's my hair? What about the pearls?

It's bad when the students take their patients home with them

I can go home in how many hours?

I like Monmouth!

I lost an earring

Hi! We're your doctors!

Intubate this!

'm on call

Is that the nurses' boat?

My variant of the Heimlich maneuver

Hey, I just read the articles

Medical School: You Got to Love It!

"Medical School: You Got to Love It!"?
Well, this just shows what medical school does to your grammar.

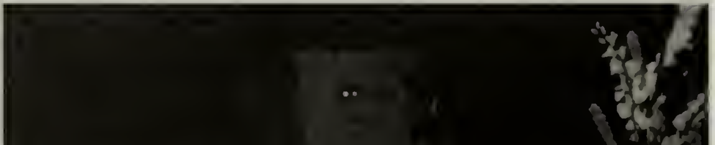
Chapter 6.
The Brain Is A Terrible Thing To Waste

What . . . Me Worry?

Halfway through the Boards, Bill discovers his "Secret" still works.



"I'm telling ya Dave; nose size does correlate!"

No, No, *BLOW* into the tube!!!

"Hey Wendy, did you see my ______________?"
(Fill in the blank at your discretion.)

"I Think Craig just sliced that big pulsing thing in the middle . . . Oops!"

"What are they talking about? I can't hear an S_3."

"Don't you feel like we're back in high school?"

"Hey! I finally figured out how to write these notes:"
S - No c/o
O - VSS
A - stable
P - con't current Rx

Eric, next time just say "NO"

"You know Karen, I never should have gone to that wine & cheese party while on an MAO inhibitor!"

. . . and then I grabbed him like this!"

"Hmmmm . . . I wonder if she'd notice?"

. . and their neurons die.

Art, did you know that pilferage from the Bagel Cart is why your tuition is $25,000/year?

George, didn't your mother ever tell you that your face might stick that way?

"Hey Brainman, your synapse or mine?"

Audabe

As the dawn breaks, the sun will rise
To draw the breath of day.
I stand forlorn beside the bed,
Hesitant to leave.

I shiver, as if cold, and cold I should be,
The perspiration of our night together,
Sweat and blood,
Fresh upon my clothes.

I was your first, I know,
And you were mine as well.
Together, we came into this naked room
As clumsy as two neophytes could be.

Then you beckoned with those moonstruck eyes,
Beckoned me to save you from yourself;
And we embraced,
My hands firm upon your tender breast.

Your skin saw pale and smooth and cool;
And, though you barely knew me,
You received me with a sigh
Each time I thrust upon your silent chest.

I tried to follow you in rhythm,
In rhythm with your breaths,
As we fell in love,
Together, and with life!

But I was not enough
To bring you to the edge.
You did not make it to the ectasy
Of day.

Sadly, I know I must leave you,
Leave you forever,
As a caring voice pulls me away . . .
"Doctor, you did your best.
  Go home and get some sleep."

Scientists versus humanists

Just what you've been waiting for — it's time for the Scientists vs. the Humanists. They've been throwing beer bottles at, or better yet, killing each other for the past 100 years. In keeping with this illustrious tradition, I will let the two sides battle it out, here, in my very column.

It's hard to tell who's winning; that depends on who you ask. Who's losing? That's easy, we all are.

Is it possible that I have been hallucinating about the animosity here? It wouldn't be my first hallucination, but I can find no other answer to why a particular group of engineering students, on finding out that there was a philosophy major in the same room, began to laugh and make derogatory comments about the discipline of Philosophy in general.

I've also met people who, on finding out that I would like to go to medical school, have launched an hour-long crusade designed to make me see the evil of my ways, and to renounce any form of scientific thought.

I find science fascinating (enough to make it one of my two majors). Like it or not, when you think about brain injuries, you realize how little control we have over our personalities. Small brain lesions (which can be produced by a hard hit on the head) to the right areas could prevent you from being able to read or write. Move the lesion over a bit and you could lose a large part of your memory. The amount of chemical reactions in our bodies is staggering. Throw one wrong chemical into the chain and *poof*, goodbye!

By looking at human beings from a scientific perspective, I have evoked the hostility of many humanists — I have no doubt about this. Of course there's more to us than that, but many humanists seem to want to deny the influence of our biology on our minds. Go ahead, it will still be there.

I also share many aspects of the humanist position. In case you haven't noticed, I have very strong feelings toward free thought and the individual. The idea that society is more important than the individual is bull, as far as I'm concerned. Historically, science is responsible for that one, but science always did (and does) love to wallow in its own self-importance.

Hey, scientists, did you know that the revolution on which modern science is based — Copernican physics — did not derive all the proofs of its theories using the (beloved) scientific method?

Galileo, who supplied the proofs for Copernicus' ideas, believed so strongly in the correctness of the theory that he altered existing data and created some of his own "facts" in such areas as dynamics and optics before he had all the evidence in. (If you don't believe me, check out *Against Method* by Paul Feyerabend).

Whether he turned out to be correct or not is irrelevant; he committed the cardinal sin, as anyone who has taken Chem 14 knows, "thou shalt not make up thy data." The developer of the scientific method didn't use it. Kind of like finding out the truth about Santa Claus, isn't it?

Humanists, you worry me. You are the ones who pride yourselves on your open-mindedness. Talking to you about open-mindedness in the area of science is like talking to a fundamentalist about religion or telling a beauty pageant winner about beauty tips — get the idea?

Some of you humanists probably feel we'd all be better off without science and that all scientists are unfeeling slime. Science has enabled nations to feed their populations, prolonged life and has allowed us to care for our sick. You don't see that there is humanism in science.

I've heard you attack psychiatric hospitals for their abuses on the human being in the name of science (I can't argue, but I'm not trying to). But some people would be much worse off if they were not inside one.

Humanism could (and should) play a very important role in keeping science from getting out of head on its rational principles — forgetting about us individuals.

Time out. I'm getting tired of listening to my split-personality fight with itself (although it is more interesting than a presidential debate). Let's not be so serious. I'm graduating next week and have no idea what I will be doing for the next year so I have plenty of time to be serious.

We are only held back by ourselves and what we think our limitations are. Play around with this: you can do anything if you truly believe you can. What you are now incapable of doing is only a result of lack of true belief in yourself. The only reason I can't fly is that I don't truly believe I can. No matter how many times I say to myself "I can fly," the doubt still exists, therefore, I will never fly.

Since I'm leaving Happy Valley (and chances are that you're not!), I'll force on — er, impart on you my philosophy of life — *experience everything you can.* Experiencing isn't necessarily limited to events or one-nighters. A good conversation or a good idea is an experience. So is letting yourself feel.

I'll probably miss this place but new experiences were getting harder to come by. That's when it's time to fly.

Your reason and your passion are the rudder and the sails of your seafaring soul. If either your sail or your rudder be broken, you can but toss and drift, or else he held at a standstill in mid-seas. For reason, ruling along, is a force confining; and passion, unattended, is a flame that burns to its own destruction. Therefore let your souls exalt your reason to the height of passion, that it may sing;

Boast not thyself of tomorrow; for thou knowest not what a day may bring forth.

Proverbs 27:1

For all have sinned, and come short of the glory of God.

Romans 3:23

But he was wounded for our transgressions, he was bruised for our iniquities: the chastisement of our peace was upon him; and with his stripes we are healed. All we like sheep have gone astray; we have turned every one to his own way; and the Lord hath laid on him the iniquity of us all.

Isaiah 53:5,6

For the wages of sin is death; but the gift of God is eternal life through Jesus Christ our Lord.

Romans 6:23

For by grace are ye saved through faith; and that not of yourselves: it is the gift of God: Not of works, lest any man should boast.

Ephesians 2:8,9

That if thou shalt confess with thy mouth the Lord Jesus, and shalt believe in thine heart that God hath raised him from the dead, thou shalt be saved.

Romans 10:9

Neither is there salvation in any other: for there is none other name under heaven given among men, whereby we must be saved.

Acts 4:12

He that believeth on the Son hath everlasting life: and he that believeth not the Son shall not see life; but the wrath of God abideth on him.

John 3:36

For what shall it profit a man, if he shall gain the whole world, and lose his own soul?

Mark 8:36

Come now, and let us reason together, saith the Lord: though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool.

Isaiah 1:18

University Hospital
Jniversity
ledEvac
N52 MB

We're moving right along! From the horse-drawn ambulance of the 1890s to the 1912 Packard to the University MedEvac helicopter . . . we have been bringing our patients in style . . . to the best possible care available. In the 1890s it was antiseptic surgery, tender care and concern . . . today it is MRI and transplants and monoclonal antibodies . . . in 2000 what will it be?

You will provide the answers. You have been educated to move medicine into the 21st century, to develop the techniques and the materials for even better health and to provide them always with the same care and concern.

Take with you our admiration
And our best wishes as you advance in your profession.

ST FRANCIS HEALTH SYSTEM

St. Francis Health System is a growing, intergrated regional health care provider. The flagship of the system is St. Francis Medical Center. The 750-bed regional referral teaching hospital offers medicine, surgery, critical care transport, physical rehabilitation, psychiatry and chemical dependency treatment. Specialized technologies include: laser surgery, lithotripsy, hyperbaric medicine and interhospital critical care cardiac transport. Specialized Centers of Excellence are:

- The Pittsburgh Laser Center
- The Center for Cardiac Care
- The Center for Critical Care
- The Center for Physical Rehabilitation
- The Center for Chemical Dependency
- Treatment

Nine residency programs are available in:

- Transitional Program
- Internal Medicine
- Diagnostic Radiology
- Psychiatry
- Oral and Maxillofacial Surgery
- Ophthalmology
- Combined program — Physical Medicine and Rehabilitation plus
- Internal Medicine
- Physical Medicine and Rehabilitation
- A Fellowship in Cardiology

In addition to the main facility, St. Francis Health System operates a Medical Park in the fastest growing township in the nation to the north of Pittsburgh where a free-standing emergency and diagnostic center, a 150-bed skilled nursing facility and a medical office building are housed. A second 150-bed skilled nursing facility is also located off-site in the east side of Pittsburgh.

Dedicated to improving
health care
through
drug research.

Easton Hospital Residency Programs

University Affiliation.
As a major teaching affiliate of Hahnemann University School of Medicine, Easton Hospital is the site for regular third year medical and surgical rotations; fourth year medical and surgical electives; and internal medicine, surgery, and transitional year residencies of outstanding quality.

High Passing Rates.
Easton residents pass their examinations! In addition, Easton Hospital has an outstanding record for placing graduates in quality subspecialty programs.

Hands-On Experience.
Our dynamic combination of "learning by doing" plus excellent supervision brings results: our graduating surgical residents were recently rated better than the 90th percentile in the number of complex surgical procedures performed.

Patient Diversity.
The wide variety of clinical pathology diagnosed and treated at Easton Hospital's state-of-the-art facility is comparable to that experienced at university centers. Most of our patients are diagnosed and treated *first* at Easton Hospital, not after evaluation elsewhere.

Excellent Practice Opportunities.
Young physicians seeking to start a practice find the metropolitan area surrounding Easton a "land of opportunity." The Lehigh Valley offers an attractive environment, a rapidly growing professional population, low unemployment *and* proximity to NYC and Philadelphia -- ideal for establishing successful medical practices.

Let Easton Hospital show you how our programs can help prepare you for a successful and fulfilling career.
Call the Director of the Department of Medicine, (215-250-4013) or the Director of the Department of Surgery, (215-250-4014).

Appendix

Well, this is it. By the time you read this, the Class of 1991 will have graduated into the promising world of the M.D. In effect, this is the last statement of the class. So, to all those who granted me the last word, Thank You!

Looking back over the last four years, it is amazing to see how far we progressed. As a group we survived it all relatively intact. We got through all the lectures, both fascinating and tedious. We successfully tackled Gross Labs, Exam Weeks, I.C.M., two parts of the Boards, rotations, O.S.C.E.'s, Sub-Internships and the Match Process. Construction, Vine Street, Philadelphia's economy, merger scares, non-working elevators/escalators, and thick bureaucracy couldn't stop us.

Hahnemann took in a diverse group of semi-informed semi-skilled pre-meds and turned them into knowledgeable, skilled and compassionate physicians and surgeons. I am proud to be one of this group.

This book is a statement of the 163 individuals who worked hard and achieved much. When I took the job of Yearbook Editor-in-Chief, I had a vision of what this project should become. After long hard work, I think we came close.

A Yearbook is not easy to create. Many people believe such a project to be different things. Was Medic 1991 supposed to be a statement of the graduating class or of the institution? Was it supposed to celebrate the four year history of the departing class or one year's activity of all the medical students in the school? Was I supposed to create a glossy advertisement for Hahnemann University or express the personality and sentiments of my classmates, both the good and the bad? What you hold in your hands is a hybrid of all of the above. It celebrates the Class of '91's humor, spirit and feelings toward Hahnemann. Yes, we poke some fun at our school; but we also do the same to ourselves. While medical school can be hard and anxiety producing, it can also present moments worthy of humor. With this in mind, just sit back, relax and enjoy.

To he or she who shall follow me and publish Medic 1992: My Sympathies! Yes, I am glad I did this. No, I would never do this again. Now I know why none of those who already published a yearbook volunteered to do this one. I want to thank Roberta, my Business Manager, and everybody else who helped make this job survivable and possible.

Now back to the Last Word! To my classmates and my readers, here it is: Zymosis! Actually, it is "GOOD LUCK!"

Dave
